

Outline Opportunity

We're looking for a software developer who has a solid foundation of Drupal development experience together with in-depth PHP and MySQL knowledge. You will join one of our existing Drupal development teams and will contribute to the continuing growth and success of company while building compelling and innovative websites.

Responsibilities:

- To use Drupal 7 to develop and extend existing contrib and custom modules in the building of and maintaining client websites
- Installation, configuration and theming of Drupal based websites
- Promote a constant learning environment and provide insightful guidance via collaboration with other developers to support mutual growth and ensure high quality of all software produced by the team
- Work closely with the Project Management, Account Managers and Team Leaders to define and estimate the technical scope of web projects
- Work with Project Managers and team colleagues to ensure that development workflows adhere to project requirements and timelines
- Keep well informed of industry best practices and advances and share new knowledge to improve company processes, technology, and results
- Assist in provision of occasional client training in collaboration with our dedicated training department
- Interact with remote teams to ensure complete delivery of web applications
- Liaise with QA engineers in consistent development and improvement of QA processes
- Provide documentation as required and contribute to peer code reviews, planning sessions, code sprints and routine status stand-ups
- Assist in release/deployment planning and execution activities
- Use analytical skills to identify and resolve coding, development and/or process issues
- Performance of site maintenance and upgrades

About You:

The ideal candidate will be a highly motivated and talented digital developer, with relevant proven commercial experience. He/she must also be enthusiastic and focused with a desire to continuously learn and keep up to date with emerging digital technologies. We're looking for someone who is ideally fluent in Drupal, PHP, MySQL, HTML, CSS, Javascript and JQuery.

Desirable Skills and Experience:

- Degree in Computer Science or a relevant field
- Minimum of 1 year Drupal web development experience
- Experience with Drupal architecture, best practices, and coding standards
- Intermediate proficiency in Linux administration, Apache configuration, MySQL database design, and PHP web development
- Strong communication and interpersonal skills
- Experience and/or knowledge of Agile software development methodologies
- Experience of using Atlassian JIRA project and issue tracking software or similar tools

Drupal Developer

Chichester, West Sussex

- Knowledge of code repository revision control tools such as SVN, GIT, etc
- Knowledge or desire to learn about integrating open source and 3rd party applications into existing systems
- Proficiency in hand-coded W3C compliant Javascript, HTML & CSS
- A passion to learn and advance your self-education, taking initiative for self-improvement
- Strong sense of responsibility and initiative
- Strives for excellence at every level

Salary and Remuneration

We offer an attractive salary and remuneration package depending upon individual skills and experiences.

About Us

Unipro started in 1997 and we have built our solid reputation by designing, implementing and managing inspired technology solutions for medium to large organisations. We deliver high-performance, cost-effective business applications to an ever-expanding base of retail and commercial clients, on-time and within budget.

Even though we have many years of experience in integrating a wide range of legacy and bespoke systems and developing up-to-date multi-channel ecommerce platforms, we now primarily specialise in Drupal implementations – usually for clients and projects that have demanding, multi-faceted integration requirements.

If you are interested in applying for this role, send an email to jobs@theuniprogroup.com with “Drupal Developer Vacancy” in the subject line. Include your CV and a brief covering letter.
