Junior / Trainee Drupal Developer

Chichester, West Sussex

Outline Opportunity

We're looking for a junior software developer who has experience of PHP and MySQL. This position would be perfect for a recent graduate with some PHP experience who is keen to develop into a dedicated Drupal Developer. The role will involve working across a solid portfolio of clients, building websites based on open source technologies.

You will join one of our existing Drupal development teams and will help contribute to the continuing growth and success of company, gaining experience through regular in-house and specialist training opportunities.

Responsibilities:

- To learn how to install, configure and theme Drupal based websites

- Through a constant learning environment and collaborating with other developers gain the essential knowledge to ensure high quality software is produced by the team

- Work closely with Team Leaders and experienced developers to learn how to define and estimate the technical scope of web projects

- Keep well informed of industry best practices and advances

- Liaise with QA engineers in consistent development and improvement of QA processes

- Provide documentation as required and contribute to peer code reviews, planning sessions, code sprints and routine status stand-ups

- Assist in release/deployment planning and execution activities

- Learn how to use analytical skills and available tools to identify and resolve coding, development and/or process issues

- Performance of site maintenance and upgrades

About You:

The ideal candidate will be a highly motivated and enthusiastic digital developer, with relevant educational background and/or knowledge. He/she must also be enthusiastic and focused with a desire to continuously learn and keep up to date with emerging digital technologies. We're looking for someone who has existing knowledge in at least some of the following Drupal, PHP, MySQL, HTML, CSS, Javascript and JQuery.

Desirable Skills and Experience:

- Degree in Computer Science or a relevant field

- Web development experience in a professional or personal capacity

- Existing experience or ability to quickly become proficient in Linux administration, Apache configuration, MySQL database design, and PHP web development

- Knowledge or experience of CMS applications / frameworks (e.g. Drupal / WordPress / Joomla)

- Strong communication and interpersonal skills

- A passion to learn and advance your skills via self-education, taking initiative for self-improvement

- Strong sense of responsibility and initiative

- Strives for excellence at every level

Junior / Trainee Drupal Developer

Chichester, West Sussex

Salary and Remuneration

We offer an attractive salary and remuneration package depending upon individual skills and experiences.

About Us

Unipro started in 1997 and we have built our solid reputation by designing, implementing and managing inspired technology solutions for medium to large organisations. We deliver high-performance, cost-effective business applications to an ever-expanding base of retail and commercial clients, on-time and within budget.

Even though we have many years of experience in integrating a wide range of legacy and bespoke systems and developing up-to-date multi-channel ecommerce platforms, we now primarily specialise in Drupal implementations – usually for clients and projects that have demanding, multi-faceted integration requirements.

*If you are interested in applying for this role, send email to **jobs@theuniprogroup.com** with "Junior Drupal Developer Vacancy" in the subject line. Include your CV and a brief covering letter.*
